# Infor CloudSuite Healthcare

## Solution summary

Healthcare providers face a range of challenges, such as implementing mandated reform while adapting to value-based reimbursement—all while focusing on controlling costs. At the same time, healthcare organizations need to maintain a high level of patient satisfaction matched with quality outcomes. As a result, operational and administrative systems need to support expanded responsibilities, transforming traditional financial, supply chain, and human capital processes while arming decision makers with sound, insightful data.

**Infor CloudSuite™ Healthcare** is an integrated platform of technology solutions that can help drive business critical functions within a healthcare organization. The capabilities of this suite include financial management, human capital management, supply management, procurement, and enterprise performance management. Organizations can capitalize on the entire suite or a component of the broader platform.

**Infor Enterprise Financial Management—**Infor Enterprise Financial Management provides a complete set of core financial management capabilities, including general ledger; accounts payable; accounts receivable; billing and revenue management; lease management; inventory control; project accounting; activity management; asset management; invoice matching; multi-book ledger; average daily balance; mobile financials; and Infor CloudSuite Clinical Bridge for linking clinical, financial, and operational systems. It also includes an Implementation Accelerator, which helps users get up and running quickly, with healthcare-specific capabilities built in.

**Infor Supply Chain Management—**Infor Supply Chain Management includes a robust procurement platform for improving the way you manage healthcare purchasing and supplies. It includes capabilities for purchase orders; requisitioning; procurement punchout; strategic ledger; smart reconciliation; mobile requisitions; purchasing, inventory; and electronic payment connector.

It also includes advanced procurement capabilities, such as a supplier relationship management bundle that encompasses: strategic sourcing, supplier order management (SOM), contract management, electronic data interchange for supply chain management, and distribution management.

**Infor Human Resources Management and Infor Payroll—**Infor Human Resource Management and Payroll includes core global HR, North American payroll, Employee and Manager Self-Service, and Mobile Employee.

**Infor Global Human Resources (HR)**—Infor Global Human Resources is a next-generation human resources management platform that powers a more holistic hire-to-retire process for your organization. Designed to increase the efficiency of HR processes and optimize investments in human capital, the solution focuses on helping you keep critical talent engaged while supporting your strategic goals. New absence and benefits functionality fully integrates wth Infor Payroll.

**Infor Talent Management**—Infor Talent Management helps you reduce turnover and improve performance with capabilities that include talent acquisition, compensation management,  succession management, development planning, talent manager, and mobile recruiter.

**Infor HCM Analytics**—Infor HCM Analytics provides business insights on the performance and effectiveness of HR teams, while highlighting the strategic impact of HR initiatives and the bottom-line value to the organization.

## Technology platform

All Infor CloudSuite Healthcare solutions include the following technology components: Lawson System Foundation, Landmark Technology Runtime, Net Express App Runtime, Infor Process Automation, Infor Notifications, Add-ins for Microsoft, Infor Ming.le Enterprise, Data Warehouse Designer (Restricted Use), Business Vault (Restricted Use), Infor ION Process with Business Vault, ION Connector, Infor BI, SmartOffice.

## Add-on components

Additional solutions that enhance and extend your base CloudSuite deployment are available as add-ons for additional subscription fees. Contact your sales representative for more information. Common add-ons include:

**Infor BI (Business Intelligence) and Healthcare Analytics**—Infor BI provides financial and operational reporting and analysis, dashboards, planning, budgeting, forecasting, role-based analytics, data mining, and financial consolidation capabilities. In addition, the solution provides pre-built, industry-specific analytics designed to help healthcare providers move beyond data sharing and analysis to improved performance. Providers can better understand contract savings, purchasing trends, supply utilization, labor costs, workforce productivity, staffing needs, payment volumes, departmental performance, adjusted admissions and patient days, cost per discharge, profit per outpatient visit, and overall business operations.

**Infor Reporting**—Infor Reporting provides user-friendly reporting tools and pre-built reports that are ready to use right out of the box to put the power of analytics directly into the hands of power users—without help from IT.
