

Infor Cloverleaf Health Information Exchange

Upgrade to an integrated HIE

Chances are that your healthcare organization will implement a private health information exchange (HIE) soon, if it hasn't done so already. What's less certain is how well the HIE technology you adopt will advance the goals of your organization. You also may not know how much risk of downtime, cost, and security you'll encounter with new, unfamiliar technology. Your HIE quickly becomes a core element of your health system, so it's essential to choose proven technology with the highest possible degree of interoperability and compatibility with many other systems, as well as rich, focused functionality aimed at the specific needs of your organization.

Choose a proven partner

The extensive healthcare technologies delivered by Infor® address the full range of challenges faced throughout the healthcare industry, because they're built on Infor's expertise at implementing software solutions at top healthcare organizations worldwide. That's why more than 10,000 clinicians and administrators already exchange data via the Infor Cloverleaf® HIE for more than 10 million patients. Those providers know that you can share your patient data between care providers more easily with Infor Cloverleaf, a reliable, proven platform for healthcare integration and interoperability.

Achieve the triple aim

By taking advantage of Infor Cloverleaf Health Information Exchange (HIE), your organization builds on a proven, industry leading technology platform that gives you the power to handle the most complex interoperability challenges, while maintaining top performance. Cloverleaf can help you boost efficiency and achieve the triple aim of improving the health of the population, enhancing the experience and outcomes of the patient, and reducing per capita cost of care for the benefit of communities.

You'll get a direct, efficient path to building a successful private exchange with Infor Cloverleaf HIE, along with the familiarity and reliability of the Infor Cloverleaf solution.

You'll also avoid vendor lock-in, because Infor Cloverleaf delivers rich HIE capabilities, while integrating smoothly with all other clinical systems, including Epic, Cerner, NextGen and Athenahealth, as well as with other EMR and EHR systems. As a result, you gain:

- **Heterogeneous EMR interoperability for effective care coordination**—You can easily share patient data between EMR systems, regardless of where the data originates, so clinicians can access and use information when they need it. The Cloverleaf HIE platform solves complex interoperability challenges.
- **Faster progress toward satisfying Meaningful Use requirements**—By providing a fully interoperable view of patient records to hospitals, physicians, labs, and other providers, Infor Cloverleaf HIE quickly expands the value and usability of your EHR or EMR system because it gives you all relevant information at once.
- **A head start for building an accountable care organization (ACO) or patient centered medical home (PCMH)**—Whether you expect to establish an ACO or PCMH in the near future or consider it a long-term goal, Infor Cloverleaf HIE gives you the strong, collaborative foundation you'll need to make your patient-centered health community collaborative successful.
- **Proven reliability with widely accepted technology**—Why take risks with unknown or possibly incompatible solutions? Build your HIE on Infor Cloverleaf, the solution with the broadest integration options and richest capabilities in the industry.

In addition to unmatched integration capabilities, Infor Cloverleaf HIE includes features that are crucial to gaining value from your healthcare technology, including:

- **Patient identity management**—A recurring challenge in healthcare is the simple-sounding task of tracking patients, tests, care protocols, general health information, and more. Infor Cloverleaf HIE includes features to improve patient tracking across the full spectrum of care.
- **Automatic compliance with current standards**—The entire Infor Cloverleaf suite is routinely updated to comply with the latest standards, including Integrating the Healthcare Enterprise, Fast Healthcare Interoperability Resources, Consolidated Clinical Data Architecture, Direct Protocol, and any new standards that arise.

More than 10,000 clinicians and administrators already exchange data via the Infor Cloverleaf HIE for more than 10 million patients.

Get better results

You'll get a direct, efficient path to building a successful private exchange with Infor Cloverleaf HIE, along with the familiarity and reliability of the Infor Cloverleaf solution. You'll be able to avoid the risk of downtime, minimize IT training requirements, and establish a platform for exchanging patient data across multiple sources to achieve better results. Best of all, you'll give your organization the flexibility to adapt to a rapidly changing healthcare environment while maintaining the highest possible level of patient care.
